Backend : Spring, Spring Boot, J2EE, Microservices, Restful APIs

Programming : Core Java, OOPs, Data Structures & Algorithms

Database : MySQL, Hibernate, JDBC

Tools : Git, Maven

Soft Skills : Problem Solving, Collaboration, Communication, Teamwork, Analytical Thinking

PROJECT

Online Food Delivery Application
September 2024 – November 2024
· Built a full-stack food delivery web app replicating Swiggy/Zomato with restaurant browsing, menu viewing, and order placement.
· Implemented User Module with registration, login, profile management, and real-time order tracking.
· Designed Restaurant Module for menu management, item availability updates, and handling incoming orders.
· Developed Order System & Admin Panel enabling order placement, multiple payment modes, order history, and system management.
· Integrated MySQL with JDBC using MVC architecture for real-time operations, scalability, and maintainability.
· Engineered an online food delivery application utilizing MVC architecture, integrating user, restaurant, and admin modules to enable seamless menu management, real-time order tracking, and scalable database operations with MySQL.

Banking Management Application
January 2025 – February 2025
· Built a Banking Management Application supporting core operations like account creation, deposit, withdrawal, balance enquiry, and account deletion.
· Ensured user-friendly workflows for seamless management of banking transactions.
· Designed for scalability and maintainability, covering all essential banking functionalities.

CERTIFICATIONS

Full Stack Web Development
Tap Academy · 2024
· Proficient in Core & Advanced Java, Spring, Hibernate, and frontend development with hands-on experience in OOPs, Java 8 features, and full-stack project implementation (Online Food Delivery App).
